* All listed capacities, within the xxx range are used for formatting and other functions and thus are not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products.

Kanguru defines a gigabyte (GB) as 1,000,000,000 bytes.

† Immune to "badUSB" threats or firmware tampering.

** Read and Write speeds can depend upon capacity, size, type, and number of files being transferred, type of OS, and the computer's hardware configuration.
